

Social Value & Community Impact

05 January 2026

Local Economic Impact

We prioritise the prosperity of our local community through strategic spending and employment. We prioritise local suppliers and small businesses to keep wealth within the community where possible. We actively recruit staff from the local area and provide opportunities for individuals from underrepresented or disadvantaged backgrounds.

Our core mission is to provide high-quality vocational training that closes the local skills gap and moves people into sustainable employment.

Community Cohesion and Inclusion

We strive to be a hub of support and a catalyst for social integration. We provide free or low-cost IT training to ensure no member of the community is left behind in the digital age. We celebrate the multicultural nature of our community through events, inclusive curriculum design, and active opposition to discrimination.

We maintain our premises as a safe space where all individuals feel welcome, respected, and heard.

Wellbeing and Social Support

Our impact extends beyond the classroom to the holistic wellbeing of our stakeholders. We provide access to pastoral care and wellbeing resources to help students overcome personal barriers to success. We collaborate with local charities, businesses and local government to provide a joined-up support network for the most vulnerable.

Measuring Impact

We do not just do good, we prove it. We track the Social Return on Investment of our services by monitoring student progression into jobs, further education, and improved quality of life. Regular surveys are conducted with students, staff, and partners to ensure our community impact remains relevant and effective.
